

FAM Millennium Equity Strategy (USD)

30 May 2025

Our Strategy

Following the 2008 Global Financial Crisis and the 2020 Pandemic, the flood of unprecedented liquidity and low interest rates in markets propelled prices of nearly all assets to record highs. Today, it is increasingly challenging for investors to achieve above-market returns using the “winning formula” of the past decade. The FAM Millennium Equity (FME) strategy is designed for investors who are willing to avoid crowded markets and embrace volatility, to achieve above-market returns over the next decade.

Taking Advantage of the Market Cycle

Just as in nature, there are also seasons in financial markets. Sowing and harvesting in the wrong season can be detrimental to any investment. Rather than trying to accurately predict year-on-year movements, we believe that capturing long-term cycles and trends brings a much greater impact for investors. There have been two important seasons in the past 20 years:

Emerging Market Season (2001 – 2010)

Best	EM 13.8	Asia -5.6	EM 55.8	EM 25.6	EM 34.0	Europe 33.7	EM 39.4	Japan -29.2	EM 78.5	EM 18.9

By identifying investments with good fundamentals and investing in them when their valuations are low (sowing) and taking profit when the opportunities mature (harvesting), FME is designed to help investors avoid the possibility of “missing the season”, as the human tendency to chase past performance can prevent them from enjoying future strong returns.

Discerning The Signals From The Noise

A three-pronged research process to identify signals that point us to **sustainable trends** which are underappreciated by the market, which come with **good fundamentals** and **attractive valuation**, with a higher likelihood of outperforming over the long term.

**Fundamental**

Study financial and economic data (e.g. GDP, unemployment rate, and inflation rate etc.) that may drive market movement to find opportunities with **good fundamentals** that are underappreciated.

**Valuation**

Picking the right valuation metrics (e.g. price-to-earnings, price-to-book, EV/EBITDA etc.) to spot **undervalued opportunities** and avoid overpaying for any investment with only good stories.

**Trend**

Seek inflection points in **sustainable trends** to capture overlooked opportunities and avoid less recognised risks (such as the end of a bond supercycle).

High Level of Active Management

Many actively managed funds underperform because they have a low active share. This happens when a portfolio's holdings are very similar to the referenced benchmark, a practice commonly referred to as 'benchmark hugging'. In contrast, **funds with a high level of active management may have greater potential for outperformance in the long run**, as there is no way any fund can outperform the market if they are investing like the market.

By investing in areas where we have the greatest conviction and applying it to our whole portfolio, we aim to provide better returns over risk through a full market cycle.

Market & Portfolio Developments

Commentary

A Resurgent Month for Equity Markets

May 2025 brought a wave of optimism to financial markets as US and China agreed to a temporary 90-day trade truce, easing fears of an escalating tariff war. This reignited risk appetite across markets and reinforced the ‘TACO’ (Trump Always Chickens Out) trade narrative. FME benefited from the risk-on environment, delivering a solid return of 5.79% for the month.

Balanced Approach Amid Uncertainty

In an environment marked by policy unpredictability and late-cycle dynamics, we’ve maintained a prudent, balanced approach. When US equities rallied strongly ahead of other major markets over the past month, our holdings here contributed meaningfully to performance. That said, our focus has also increasingly shifted to other markets as the US exceptionalism trade show signs of fatigue – year-to-date, US equities continue to lag other regions in USD terms. Over the past months, we’ve been selectively adding to positions such as Europe and India, which has been additive to performance. One key takeaway from Trump 2.0 is for investors to look beyond just passively investing in the US S&P 500 (the winning strategy in the past decade!) to invest in this new era. With FME’s global and active mandate, we are well-positioned to capture opportunities in this new market regime.

Outlook: Cautious Optimism After Strong Rally

While May’s rally has restored animal spirits, risks remain as we approach the end of the reciprocal tariff pause between the US and the rest of the world. Furthermore, the US fiscal trajectory and elevated bond yields could also weigh on markets in the months ahead. The road ahead may be smoother than April’s turbulence, but volatility is far from over.
